

## **Internshala is providing frèe trainings as scholarship to students**

Greetings from Internshala - India's largest internship platform! Hope you are doing well.

Internshala is providing frèe trainings worth Rs. 2 Lac under its Young Achiever Scholarship program to 50 bright students who have the desire to learn but may not have adequate resources to do so. The purpose of this program is to help young minds of India excel in the fièld of their interest by providing them industry relevant training programs.

### **Who is eligible for the scholarship?**

Any student (an Indian national) currently studying in a college (Undergraduate or Postgraduate) having a family income of lower than 2 lacs per year is eligible to apply.

### **How to apply?**

Students can apply here - [internshala.com/i/yas\\_tnp1](http://internshala.com/i/yas_tnp1) Applications for the scholarship are open until 25th February 2018 (midnight).

The finàl list of 50 students would be declared on 1st March 2018. Selected students will be given frèe accèss to Internshala online training programs of their choice. I Kindly request you to share this with all your students so that they can benefit from this.

I also request you to post [this article](#) on your college website and Facebook page and put up [this poster](#) on your noticeboard for your students. Please confirm after sharing.

You can speak to the Trainings Tèam on +91 85860 80747 in case you have any questions.

**Details are on next page**

## Internshala is providing free trainings as scholarship to students

### **For those students who Dream Big and want to Make It Happen, here's your chance!**

Young Achiever Scholarship- It is a noble initiative by Internshala Trainings to encourage bright students who have the desire to learn but may not have adequate resources to do so. This bi-annual scholarship program aims to help the student community by providing them free online training programs worth Rs. 2 lakhs. 50 students will be selected for this scholarship award and will be given free access to any one of the 11 industry relevant training programs which include Web Development, Android App Development, Advance Excel, Digital Marketing, Python, and AutoCAD etc.

YAS 2k18 is an opportunity for the students who dare to Dream Big but are held back due to their financial constraints. Naveen Kashyap, a winner of this scholarship, fulfilled his dream of building Formula Prototype cars by learning AutoCAD training at Internshala. In his own words:

*"In our college, there is a team, Pegastatem Motorsports, which builds Formula prototype cars for SUPRA SAE India and other national level contests. Getting into the team was a huge task itself as the required criteria were difficult and competition was high. Knowledge of AutoCAD was imperative for being a member of 'Roll Cage Design and Analysis team'. Since I knew it very well, thanks to the training, I stood out from the crowd and got through the selection process. I've come a long way since then and won many 2D drafting competitions held in the college."*

### **Who is eligible for this scholarship?:**

Any student (an Indian national) currently studying in a college (undergraduate or postgraduate) having a family income of lower than 2 lacs per year is eligible to apply for the scholarship, visit [internshala.com/i/yas\\_tnp1](http://internshala.com/i/yas_tnp1).

### **Selection Criteria:**

Your application will be evaluated on the basis of following criteria:

- 1. A sense of purpose:** Your objective of doing the specific training program [students will select the training they want to learn] and how that program may help you achieve your career goals.
- 2. Good academic background:** You should have a reasonably good academic background (10th and 12th percentage) along with no arrears in college exams.
- 3. An element of need:** Everything else being the same, the scholarship would be awarded to someone who is in a greater financial need.

So, go ahead, apply now and stand a chance to win a free training in your field of interest and gain industry relevant skills. The last date to apply is **25th February 2018** (midnight).
